EXPERIENCE

Zapier, Remote, OH — Sr. Full Stack Engineer

Sep 2018 - Feb 2024

- Brought Zapier Tables product from Alpha to General Availability adding a new product to the Zapier platform and gaining new revenue streams for the company.
- Developed the Company plan level including SAML support, teams, account permissions and more to allow Zapier to expand up market and open up higher paid plan levels.
- Full stack development and maintenance of many of Zapier's systems including Tables, Run History, Account Settings, Login/Signup, Pricing, My Zaps, and My Apps.
- Helped develop standard services like GraphQL data service, component library, and project templates.
- Mentored junior and mid level developers.

GS&F, Nashville, TN — Sr. Interactive Developer

Nov 2015 - Sep 2018

- Lead software development projects of all sizes.
- Full stack architecture and development of web apps, mobile apps, and services.
- Quickly prototyped applications to assist UX in feasibility testing
- Mentored junior and mid level developers.
- Stayed up to date on emerging technologies to advise clients and train team members.
- Worked in many technologies including: React, React-Native, Redux, Angular, NodeJS, GraphQL, Express, AWS, SQL, C#.

Schneider Electric, LaVergne, TN — Sr. Software Engineer

Dec 2008 - Nov 2015

- Acted as technical / architectural lead on software development projects.
- Designed, developed, and tested custom applications and web pages for Engineering Services group that improve project efficiency, quality, and consistency.
- Helped gather customer requirements and user feedback and compile actionable items from findings.
- Past projects include: Tool to automate creation of interactive electrical drawings for Schneider software systems, centralized job site data tracking, troubleshooting, and commissioning tool, project cost estimation tracking tool.
